# KEY ACHIEVEMENTS

- Built and owned a real-time DigiHaat Operations Control Tower, enabling faster issue resolution, escalations, and SLA visibility
- Led catalog quality and compliance by managing QC teams, standardizing data, and improving listing accuracy.
- Managed high-volume warehouse and fulfillment ops (10K+ units/month) with 99% on-time dispatch and 100% inventory accuracy.
- Served as SME across ONDC logistics and platform ops, resolving escalations and improving buyer experience.

# PROJECTS

## ONDC – MSE Digital Enablement & Centralized Fulfillment | Aug 2025 – Present

- Enabled MSE onboarding with State Govts; managed ops data, inventory flow, and readiness tracking
- Supported FBA-like centralized warehousing model to improve fulfillment efficiency and SLA adherence

## Agent Productivity & KPI Dashboard Automation | Nov 2024 – Aug 2025

- Automated Excel dashboards for ops, logistics, and agent KPIs, improving reporting efficiency by 30%
- Analyzed TAT breaches, delays, and ticket trends to drive data-backed process improvements

## DigiHaat Operations Control Tower | Nov 2024 – Aug 2025

- Built real-time Control Tower to monitor order issues, SLA breaches, and resolution status
- Automated POC assignment, tagging, and click-to-call to reduce response time and escalations

## Workflow Standardization & Training Manual | Nov 2024 – Aug 2025

- Created SOPs, escalation matrices, and training guides to standardize support operations
- Reduced ramp-up time and improved productivity through structured knowledge transfer

## Top Accounts Order & Commission Dashboard | Mar 2020 – Apr 2022

- Built Google Sheets dashboards to track orders, RTOs, and pending status for key accounts
- Automated commission calculations and monthly payout reports, reducing manual effort

## An Empirical Study of Impact of Artificial Intelligence in Marketing

Jan 2018 – Apr 2018

- Studied AI impact on marketing across industries and use cases
- Analyzed AI tools for engagement, ROI, and predictive insights
- Delivered data-backed report with trends, risks, and opportunities

## AI in Marketing – Research Project | May 2017 – Jul 2017

- Analyzed AI tools for marketing analytics, ROI measurement, and predictive insights
- Delivered a data-driven report on trends, use cases, and adoption challenges
